

CYBER SAFETY TIPS

2

CONTROL DEVICES

Protect access

Ensure that all devices are password and/or pin protected and that only adults have the admin access to devices.

Stay visible

Keep desktop and laptop machines in public places around the home. No closed doors and no secrets.

Regular review

Review your credit and debit cards to make sure you have no unrecognised transactions on them.

Be consistent

Inform others about your controls so that they do not accidentally circumvent them.

Keep control

Turn on parental controls for devices where possible. This could include TV's as well as computers and smart speakers etc.
Turn on service provider parental controls to prevent access to unwanted materials at source.
