

CYBER SAFETY TIPS

3

DISCUSS THE WEB

Be available

Try to set time aside without time limits and distractions to discuss the internet and its uses and dangers.

Be interested

Try to set aside time for your children to tell you what they have learnt at school about the web or computers.

Discuss your rules

Discuss and agree with children what rules are in place and how to check together that the rules are being observed.

Discuss the laws

Review and discuss legal rules and regulations like most social media sites do not allow young children profiles until age 13.

Be understanding

Ensure that your children know that if they tell you of an issue or fear about the internet, no matter how small it appears to you, that you will listen and respond positively.
