

CYBER SAFETY TIPS

1

EXPLORE TOGETHER

Learn together

Teach children what is good and bad on the internet by learning together.

Show support

Let children type and help them along the way. Make sure you create a supportive environment.

Regular review

Review what children have access to and check their privileges regularly (weekly/monthly).

Peer pressure

Ensure you set your own rules. Just because another child is allowed doesn't mean it is right.

Digital footprint

It is vital that children understand the concept of a "Digital Footprint" even if they are very young. This is something that could impact them positively or negatively for the rest of their lives.
